Then look for instances of something like:
`<eidstore>0000000-0...6F74646D6800</eidstore>`

Copy and paste the HEX part `(0000000038A18810-05E...E74732F636E3C6F-74646D6800)` into a HEX to ASCII converter and it will show you the pst file location in plain-text.
